

esXpress version 3.6-6

Release Notes

September 15, 2009

This document provides an overview of the changes made to esXpress for the version **3.6-6** release. It contains a list of additions, changes, known issues, and fixes for each component.

esXpress has three main components:

- Configuration and Deployment GUI Appliance – 3.6-5
- Data DeDuplication Appliance – 3.6-5
- Host side install base (RPM) – 3.6-6

Note: The Configuration and Deployment GUI and Data DeDuplication appliances are optional plug-ins for esXpress3.5/3.6 and are not required for running esXpress backups or restores.

To download the latest versions:

- **Current customers:** use the **Check for Updates** esXpress option. If you are not using either the GUI or DeDup appliances, you must install the latest RPM files manually.
- **New customers:** visit PHD Virtual's web site (www.phdvirtual.com) and register to download the latest version of esXpress.

For installation and configuration information, as well as release notes for past releases, refer to the latest esXpress documentation on the Knowledge Center web site:
