

## esXpress version 3.6-11

### *Update Notes*

January, 6 2010

---

This document provides an overview of the changes made to esXpress for the version **3.6-11** release. It contains a list of additions, changes, known issues, and fixes for each component.

esXpress has three main components:

- Host side install base (RPM) – 3.6-11
- Configuration and Deployment GUI Appliance – 3.6-11
- Data DeDuplication Appliance – 3.6-11

*Note: The Configuration and Deployment GUI and Data DeDuplication appliances are optional plug-ins for esXpress3.5/3.6 and are not required for running esXpress backups or restores.*

#### **To download the latest versions:**

- **Current customers:** use the **Check for Updates** appliance menu option. If you are not using either the GUI or DeDup appliances, you must install the latest RPM files manually.
- **New customers:** visit PHD Virtual's web site ([www.phdvirtual.com](http://www.phdvirtual.com)) and register to download the latest version of esXpress.

For detailed installation and configuration information, as well as release notes for past releases, refer to the latest esXpress documentation on the Knowledge Center web site:

---

## 3.6-11 Updates

### Configuration and Deployment GUI Appliance

- No changes this release.

### Data DeDuplication Appliance

- Fixed an issue with the Stats page where it was displaying backups to be deleted incorrectly after January 1, 2010.

### Host Side Install Base (RPM)

- Fixed an issue where Delta backups would revert to Full backups after January 1, 2010.
- Fixed an issue with restoring backups made since January 1, 2010.
- Fixed an issue with backup restore logs that were incorrect after January 1, 2010.
- Fixed an issue where background restore jobs were not displayed in the PHD menu.
- Improved VBA restore speed when restoring large VMDK files with VBA.
